# MAS-LC

## ANIMAL SCALE

### Multi-Animal Scale System

20,000 Pound Capacity from 13 x 8 feet to 22 x 10 feet

The MAS-LC provides a reliable and accurate weight for ranchers and processors that prefer a load cell based weighing system. This scale combines the accuracy of fully electronic weighing technology with steel I-beam weighbridge designs typically found in heavy capacity vehicle weighing scales. With a wide range of sizes, the MAS-LC is the right choice for any stationary weighing application.

#### Racks and Gates

Three inch thick wall tubing for the sectional uprights with two inch horizontal thick wall tubing connecting the uprights. The powder-coated 11 gauge steel plate is four feet tall and is above the structural I-beam. This will ensure reliable containment.

X-Plank flooring

X-Lug flooring

#### Flooring

The MAS-LC offers unmatched traction for animals in wet and slippery conditions with either X-Lug or X-Plank flooring. Both styles are made from durable, recycled plastic and rubber material that will never rot or harbor bacteria and moisture like wood flooring. X-Lug flooring provides a deep, aggressive tread and X-Plank flooring utilizes a less-aggressive, wheel-accessible tread.

#### Legal for Trade

Like all MAS series scales, the MAS-LC is certified for commercial use in both the United States and Canada. Scales are designed to provide accurate weights, making it Legal for Trade. Add a choice of digital weigh centers, printers or remote displays for an easy-to-use system that will provide years of proven performance.

#### Optional

- Ticket printer
- Tape printer
- 590AG indicator
- 920i® weigh center
- 920i AC stand alone indicator
- 920i DC stand alone indicator
- Light duty enclosure
- Pedestal
- Gate configuration options
